The Honorable Morgan Griffith  
United States House of Representatives  
2202 Rayburn House Office Building  
Washington, D.C. 20515

Dear Representatives Rose, McKinley, Brindisi, Riggleman, Cisneros, Griffith, and Upton,

The Mental Health Liaison Group (MHLG), a coalition of national organizations representing consumers, family members, mental health and addiction providers, advocates, and other stakeholders thanks you for introducing the *Dr. Lorna Breen Health Care Provider Protection Act* (H.R. 8094). This legislation will reduce and prevent suicide and mental and behavioral health conditions among health care professionals, sometimes referred to as “burn out.”

Health care professionals have long experienced high levels of stress and burnout, and the COVID-19 pandemic has exacerbated these issues. Dr. Lorna Breen, for whom the legislation is named, was a physician who supervised an emergency department during the pandemic, and tragically died by suicide. We must prioritize the mental health of our frontline medical professionals who are caring for some of our most vulnerable patients, and encourage help seeking behaviors for mental health concerns and substance use disorders by reducing stigma around seeking help.

Suicide is the 10<sup>th</sup> leading cause of death in the United States, and physicians have the highest suicide rate of any profession in the U.S., with a rate of 28 to 40 suicides per 100,000 doctors in 2018. That is nearly double the rate of the general population, with 12.3 suicides per 100,000 people. Therefore, there is a great need for this legislation, which:

- Establishes grants for training health care professionals in evidence-informed strategies to reduce and prevent suicide, burnout, mental health conditions and substance use disorders, and improve health care professionals’ well-being and job satisfaction.

- Identifies and disseminates evidence-informed best practices for reducing and preventing suicide and burnout among health care professionals, training health care professionals in appropriate strategies, and promoting their mental and behavioral health and job satisfaction.
- Establishes a national evidence-based education and awareness campaign targeting health care professionals to encourage them to seek support and treatment for mental and behavioral health concerns.
- Establishes grants for employee education, peer-support programming, and mental and behavioral health treatment, and will be prioritized to providers in current or former COVID-19 hotspots.
- Establishes a comprehensive study (with recommendations) on health care professional mental and behavioral health and burnout, including the impact of the COVID-19 pandemic on such professionals' health.

There is a great need to ensure that our health care professionals have the resources to support their mental health, prevent suicide, and mitigate burn out, which has become more apparent considering the COVID-19 pandemic. The MHLG thanks you for introducing this important legislation that will help to reduce suicide rates and save lives.

Sincerely,
